

Making £300 a day online is easy

Firstly, I'd just like to say thankyou for purchasing this information. I do not charge a huge amount for it so I hope that you will find it useful. Please note that if you try my system and you are not happy I will refund your money.

My system involves playing Roulette online, with not your money, but the CASINOS money. Yes you will not actually have to put any of your own money at risk. However I do stress, that you must stick to this method. When I first started using it I started with \$80, I had made myself up to \$500 within a few hours. I then started to get greedy by placing \$5 bets instead of \$1. The key to making this system work is Discipline. You must have your rules and stick by them.

I logged into one of the casinos today and deposited \$100, then withdrew it. I played using my system for 3 hours and this is a picture of my final total. For one days play. \$500

Many of the Casinos online now allow you to deposit \$100 dollars and they will match it for you, thus you will have \$200. The concept we will be playing with will allow you to play with the \$100 that the casino gives you and you will be able to withdraw your original \$100.

This means that there is NO RISK for you trying this concept. Unless of course you DO NOT follow my instructions to the very detail.

Not many people have been able to beat roulette successfully, the reason for this is because the house edge is nearly impossible to overcome in a single random scenario. But what if you knew a flaw in the Casino formula that generates these random numbers in a specific Casino? You could easily exploit this flaw and WIN everytime without every having to worry about the house having an edge on you.

Winning Roulette Stragety

Now that we know what the basics are lets continue you with how this system works, please note that making money from casinos is not a crime, however I do stress to not get Greedy, try and not make more than £150 per day in any one casino otherwise you will draw attention to yourself. At first we are learning to bid using \$1 bets, this will not make you £300 a day. You should aim to be making £80-90 in about an hour to 90minutes. This will build up your Bankroll slowly to the point were you can start betting more and making more money. I am at the point where I can safely afford to make \$5 bets and make £300 EASILY inside one hour everyday.

When the software for the online casinos was being created, a certain event was programmed to never occur. Apparently, the intentions of the original developer was to avoid situations that could cause players to doubt the randomness of the game. In doing so, however, he created an exploitable flaw that could allow an observant player to easily win. This flaw has yet to be corrected. Not all of you will go through with this and that is why it will continue to be exploited by the few of us who do.

The event that is programmed to NEVER occur is for a 'High', 'Medium', or 'Low' number to not appear for more than 15 consecutive spins. In other words, the flaw in the code is that at least ONE 'High', 'Medium', and 'Low' number MUST always appear in 16 consecutive spins. You may already be guessing how you can exploit this, but please read on to find out the best, most efficient way of exploiting this successfully.

The Flaw

The roulette table is divided into three sections, a Low, Medium, and High section, each of which you can place bets on. Here are some images to help demonstrate these sections:

The LOW section contains the numbers 1 through 12:

The MIDDLE section contains the numbers 13 through 24:

And the HIGH section contains the numbers 25 through 36:

From now on, just think of these sections as L, M, and H.

Take a blank piece of paper or use any computer text editor (notepad is good).

Spin the wheel WITHOUT PLACING ANY BETS

Write down the letter of the section containing the result (L, M or H)

Spin the wheel again (DON'T BET)

Again, write down the section containing the result (L, M or H)

Throughout the system, you keep doing this, always adding the section where the ball lands. If it lands in the Zero, write down "0".

As you do this, you will get a growing string of results (for example, you might get "L, M, H, H, L, H, M, H...")

What you are looking for is a SPECIAL EVENT. Once you get a set of 5 spins without one of the sections coming up, start betting. For example, let's say you got this sequence:

L, M, L, M, M, H, M, H

Since L has not come up for the past 5 spins, bet on section L.

Keep betting on the section until it wins, according to the following staking plan:

1st bet:	\$1
2nd bet:	\$2
3rd bet:	\$3
4th bet:	\$4
5th bet:	\$6
6th bet:	\$9
7th bet:	\$13
8th bet:	\$20
9th bet:	\$30
10th bet:	\$45
11th bet:	\$67

As soon as you win, stop betting and go back to looking for the SPECIAL EVENT. When you find it, start betting back at \$1 again, and follow the staking plan each time.

By following these instructions EXACTLY, you will make a steady profit hour by hour. It is possible to lay up to 70 bets in an hour. I'm sure you can see the substantial earning potential in this.

So, which casino's does this work for?

My system works with several casinos, but there are three that that I have confirmed it works with. Below are three links that will sign you up to these casinos. You will then be able to open an account and temporarily deposit some money. And with the links below, the casino will give you a bonus deposit and match your deposited amount (dollar for dollar/pound for pound) by adding an identical amount of THEIR money to your account. You will then be able to IMMEDIATELY WITHDRAW your deposit.

After you withdraw your money you can start using this system using THEIR money – not your own.

Getting the bonus deposit

As I just said, the casinos will give you the ability to deposit the amount you want, and they'll match it 100%. They'll even allow you to withdraw your deposit back to your credit card or bank account right after.

(The following is explained for Casino #1, but principles are the same for Casino #2)

This Casino will happily match your deposit up to \$200. Please make sure you take your deposit out IMMEDIATELY after you do it. This way you can get up to \$200 for absolutely nothing. After you deposit and withdraw YOUR money you will start using the money the Casino GAVE YOU to use this system.

Click below on the respective links, install their software, and deposit \$200 to use this System successfully. If \$200 is too much for you, start with a lesser amount like \$50 and work your way up.

A few last pointers to follow for continued success, please read:

1 - Be patient. Keep to the staking plan; don't increase your starting bet. DON'T GET GREEDY.

2 - Don't stay at the same table for more than 15 minutes. Use the "Switch Tables" button to move to a different roulette table. I don't know why but it seems to get harder when you stay on the same table for an extended period of time.

3 - Try to keep \$200-\$300 in your bank to run this system.

4 - Only ever bet what you can afford to lose. There is no point going bankrupt in a Casino. Although, in this case, you won't be risking your own money.

5 - Set your daily winnings limit to about \$200. Be smart about it, try not to get noticed. I always call it a day at \$200 and I have never had any problems.

That is all you have to do to win with my System. The only way that things will go wrong is if you do not follow my instructions exactly as written. You may not believe this is possible, but give it a try, and you will see for yourself. You have absolutely nothing to lose. Please keep in mind that it is perfectly legal since you are not breaking any rules or laws. Fixing this flaw is the Casinos responsibility, not yours.

Not all of you are going to go through with this and that is why it will continue to be exploited by the few of you who do.
